

MODULE 1:

SKETCHES & MODELS

Traditional shipbuilding is an important heritage, a huge library of knowledge. In this module, we will try to gain a part of this knowledge and techniques.

BOATS IN HISTORY

Learn about the different types of traditional boats and building techniques that were used since ancient times to the XIX-XX centuries.

VESSEL & HULL ELEMENTS & JOINTS

Learn to distinguish between parts and elements of boats: keel, keelson, stern, frames, bilge, ribbons, railings and many more.

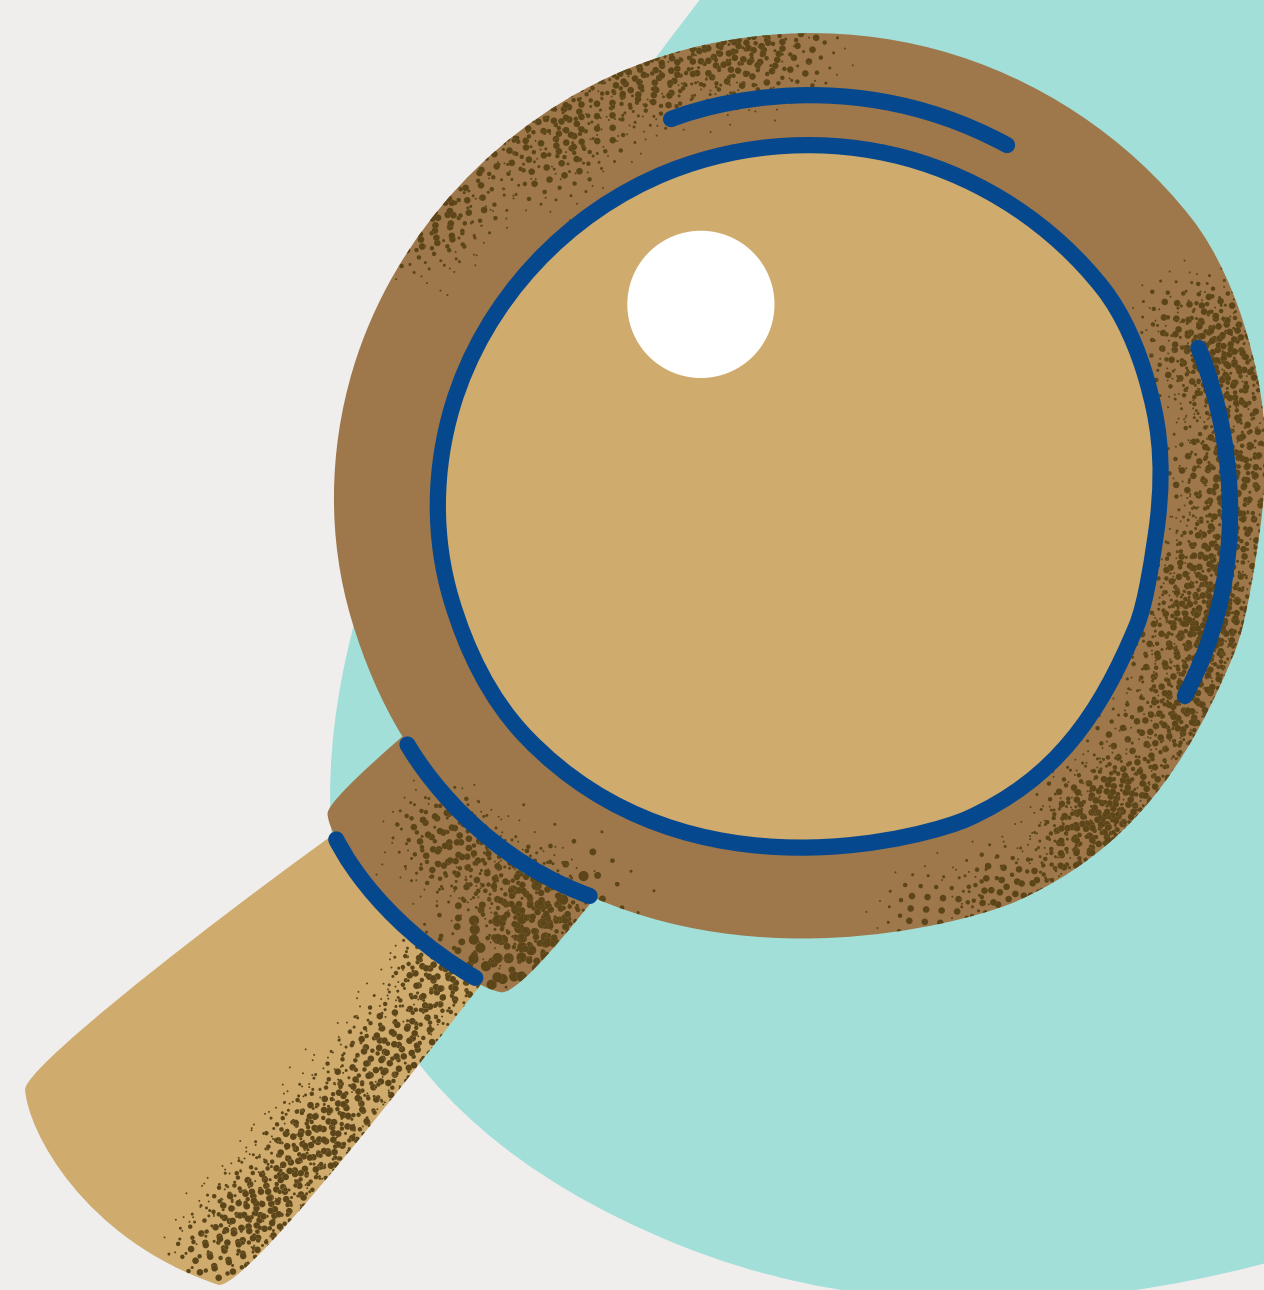

SKETCH, MODEL & EXPLAIN

Create your own boat sketches, riverside carpentry models and explain your shipbuilding plans with fluency.

IDENTIFY & CLASSIFY WOOD PIECES

Identify sawn woods and boards and classify them according to industry standards.

MANAGING COMPONENTS

Learn about timber storage and wood-based boards. Take a look at other materials and components of traditional shipbuilding techniques.
